DUTCH MOTOR CRUISER 12.50 M

This 12.50-metre Dutch motor cruiser was built in 1990 by the Van der Valk yard, a benchmark of Dutch steel boatbuilding. Its steel hull, its stability and its two thrusters, at the bow and at the stern, make it an easy boat to handle, suited to canals as well as coastal cruising.
Inside, the light-coloured woodwork creates a bright atmosphere. The saloon with its inside helm opens onto a galley with dinette. Aft, the owner’s cabin has a central bed and its own shower room; a second cabin forward and a separate WC complete the layout. Reversible air conditioning heats and cools both the saloon and the owner’s cabin.
Outside, the teak aft deck is fully covered and can be adapted to the seasons, with a second helm position, a bathing platform and a swim ladder.
The 6-cylinder Ford engine was fully rebuilt in 2008 by a boatyard (pistons, rings, bearings, crankshaft and liners reground). The hull was antifouled and repainted below the waterline in April 2026, and the bow thruster was replaced the same year.
